

Andrius Adomaitis

Looking for opportunities in TECH

Hi I'm Andrius, in 2022 I decided to change career path to TECH field. Firstly focused more on development, as I thought that is the only path to enter TECH field. Finished my CodeAcademy courses, then Sourcery Academy for developers. During the process I found out about QA and started realize, it attracts me more than software development. I started to learn tools, technologies, methodologies on Udemy, Youtube. Currently looking for an **internship/entry level/junior** opportunity to start working as **Manual / QA** guy.

I'm a team player, ready to help, like to communicate, look for improvements. Seeking result at a given time, willing to learn something new. My english is B2. Have a bachelor degree in business administration and management.

My hobbies are traveling, cooking, books, spending quality time with the family. Main interest fields – economics, investments, military technologies.
